Construction Site Control

A single application to control your valuable inventory using wireless stickers. Prevent and recognize theft, detect intruders, and monitor the entire site in real-time.

COMPLETE CONTROL OF YOUR CONSTRUTION SITE

Gates, Fences, Doors, Containers	Materials Tools	Personnel	Machinery	Environment

RFID / GPS — 200 mm

Long range RFID badges and GPS trackers detect movement of your tools and materials outside of construction hours.

Anywhere, fully autonomous.

Prevent theft and vandalism. Know when & where your materials & tools exit the site.

Track unauthorized access to your site using sensors.

Track & Control inventory and materials, their location, and control them as they arrive and exit the site.

How it works

1. **Stick** RFID sensors to the objects you want to track. Easy install of sensors for noise, gas, dust, water collection, motion, etc.

2. **Login** to the Clariance mobile app to manage alerts and view reports.

3. **Receive** instant SMS/EMAIL notifications and alerts as materials come and go, in the case of unauthorized access, and more.

Resource management

Know where your assets are at all times.

- Critical inventory
- Tools and materials
- Employees and staff

Deal with complaints

Autonomous sensors monitor noise levels, dust and gas concentration, and more. This empowers you to prevent/react to complaints.

Loss prevention

Prevent theft, loss, and vandalism.

- Important assets
- Monitor site access
- Watch closed areas
- Instant notification
- Make sure everything is in its right place

Accident prevention

Small tags with ID transmission enable you to protect and manage your workforce by knowing in real-time if personnel is on-site or in a critical zone.

OBJECT MONITORING BY CLARIANCE
