

# Protect your controlled environments

Keep your sensitive equipment safe. Get notifications & reports when the environmental conditions of your equipment are out of limits.

## Trackside equipment housing

Clariance helps railroads care for public safety by reporting the health of their trackside equipment shelters.

## Communication shelters

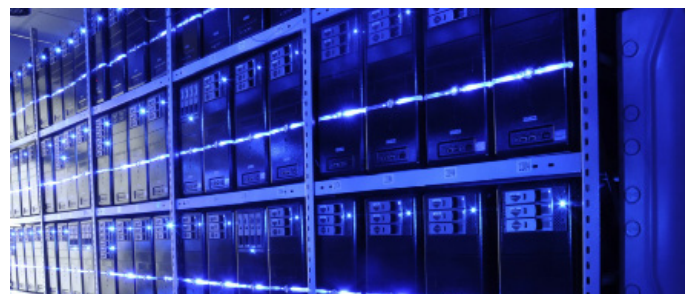

View instant reports on the health of your shelters and dispatch maintenance if anything goes wrong. Automated alerts and reporting included.

## Broadcast Transmitter Sites

Use notifications and reporting to improve the up-time of your transmitter sites. Respond quickly when a controlled environment is compromised.

## Datacenters

Protect your datacenter by monitoring humidity, temperature, and water collection throughout the datacenter.
